# Marble-Lite Restaurant Tables

Marble-Lite has been manufacturing since 1978 and setting the standard of quality and service in the cast mineral industry. A family operated business serving clients locally, nationally, and internationally. Marble-Lite's emphasis is on building client support and relationships.

Marble-Lite specializes in manufacturing for industries, such as restaurants and hotels, looking for made-to-order unique projects. Our restaurant table tops are a common sight in restaurants all over the U.S.A. Our tables are enduring, beautiful and maintenance free.

Designers enjoy the look of Marble-Lite due to its ability to customize any look from contemporary to timeless that meets the needs of their branding specifications and designs.

# Benefits of using Marble-Lite Restaurant Tables:

- Marble-Lite tables can mimic the luxurious and elegant appearance of natural marble at a lower cost. It comes in a wide range of colors and patterns, allowing you to choose a design that suits your restaurant's ambiance.
- Marble-Lite tables can withstand the wear and tear of a busy restaurant environment. It is resistant to scratches, impact, and stains, making it suitable for heavy use.
- The non-porous surface of Marble-Lite tables makes it easy to clean and maintain. Spills, stains, and food residues can be wiped away with a damp cloth and mild soap, keeping the tables looking pristine.
- Unlike natural marble, which can have variations in color and veining, Marble-Lite tables offers consistent patterns and colors. This can be advantageous when you want a uniform look across all your restaurant tables.
- Marble-Lite tables are generally more cost-effective than natural marble, making it a budget-friendly choice for restaurants looking to achieve a high-end aesthetic without the associated high costs.
- Marble-Lite tables can be molded into various shapes and sizes, allowing you to create custom table designs that fit your restaurant's layout and style.
- Marble-Lite tables are non-porous, which means that they resist the growth of mold, mildew, and bacteria. This makes it a hygienic choice for restaurant tables, where cleanliness is of utmost importance.
- While you should still use caution with hot objects, Marble-Lite tables are generally more heat-resistant than natural marble. Placing hot plates or dishes on the table is less likely to cause damage.
- In the event of minor damage such as small scratches or chips, Marble-Lite tables can be repaired and refinished relatively easily, extending the lifespan of your restaurant tables.
- Compared to solid stone options, Marble-Lite tables are lighter in weight. This can be beneficial for rearranging furniture or for outdoor dining areas.

Overall, Marble-Lite tables offer a balance between aesthetics, durability, and affordability, making them a practical choice for restaurants seeking an upscale look without breaking the bank.

## Custom Made Tables

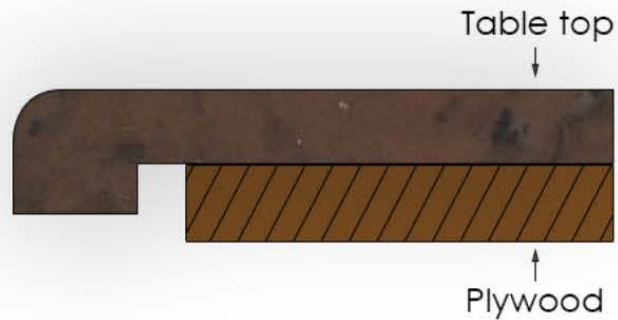

Need a size that's not a standard, no problem! We can make tables in any size or shape.

Our restaurant table tops have a range of beautiful colors. From the popular Carrara White to our newly developed Granilux line of colors for restaurant table tops which now includes a Concrete look.

Granilux restaurant table tops are a man-made product that captures the beauty of granite and the non-porosity of polymers. Granilux is a combination of natural materials such as magnesium, Titanium, iron oxide, quartz plus many others, bonded together by a polymer.

Choose from true to life Granilux and marble finishes, as well as high gloss solid finishes, or even custom RAL color options.
